SUMMARY

- Computer Engineering **graduate** and **QA Trainee** at **Maitri Services** with strengths in software testing, debugging, and problem-solving, seeking to apply technical skills to develop reliable software solutions.
- Served as the **sole QA** across multiple live client projects, taking ownership of test planning, execution, defect tracking, and quality validation.
- Experienced in functional, exploratory, regression, responsive, cross-browser, and usability testing, with **50+ Jira defect reports** and hands-on testing across mobile, tablet, and desktop environments.
- Hands-on experience developing UI automation tests using **Selenium** WebDriver, **Python**, and pytest, with foundational knowledge of SQL.
- Technical background in web development providing a practical understanding of application architecture and enabling more precise test cases and actionable defect reports.
- Independent, deadline-driven, and comfortable collaborating with clients, developers, and project teams.

WORK EXPERIENCE

QA Trainee | Maitri Services *October 2026 – Present*

- Perform software testing and verify bug fixes.
- Report and track defects using Jira.
- Collaborate with developers to ensure software quality.

QA Intern | Evlaveia Software Services *July 2026 – September 2026*

- Designed and executed functional test scenarios covering key website features, user flows, and usability requirements, documenting findings with clear reproduction steps and expected results.
- Created and maintained 50+ Jira defect tickets**,** applying severity and priority classifications and organizing issues within a Scrum-based sprint workflow.
- Performed cross-device and viewport testing at 375×667 and 768×1024 resolutions, identifying layout, navigation, content, and interaction inconsistencies across screen sizes.
- Established standardized QA practices for defect reporting, testing, and documentation, improving consistency in reusable test formats and consolidated issue reporting.
- Developed Selenium WebDriver automation using Python and pytest to test input validation scenarios, including password, email, phone, and age fields.
- Expanded technical QA knowledge through SQL and database testing practice.

EDUCATION

Bachelor of Computer Engineering | *Lalitpur Engineering College, Chakupat* | 75.50% 2022 – 2026
+2 (Science) | *Omega College, Kumaripati* | (GPA 3.57) 2020 – 2021
SEE | *Horizon English School, Dhapagal* | (GPA 3.65) 2005 – 2019

PROJECTS | *(Link to Full Projects)*

- **Registration Form Automation | Selenium + Python + pytest |** *(Link to Project)*
  Relevant Skills: Selenium WebDriver, Python, pytest, UI Automation, Test Automation, Validation Testing
  - Developed automated UI tests for registration form validation using Selenium WebDriver, Python, and pytest.
  - Automated validation for password, email, phone, and age fields with assertions.

- Structured test cases using pytest for better organization and maintainability.

- **JobTracker** | *(Link to Project)*
  Relevant Skills: React, TypeScript, Node.js, Express.js, PostgreSQL, Docker
  - Built a full-stack job application tracker using React, TypeScript, Node.js/Express, and PostgreSQL.
  - Worked across frontend, backend, databases, and Docker, gaining end-to-end web development experience.
- **Restaurant Web Application** | *(Link to Project)*
  Relevant Skills: React, Node.js, Express.js, MongoDB, Mongoose
  - Developed a responsive restaurant web application, including smooth navigation and a mobile hamburger menu.
  - Built a Node.js/Express backend connected to MongoDB for application data management.
- **Captionary: Generating Image Descriptions with ResNet and LSTM** | **Major Project** |*(Link to Project)*
  Relevant Skills: Python, CNN, LSTM, Deep Learning, TensorFlow, ResNet-50, Bahdanau Attention, MS COCO
  - Developed an image captioning system using ResNet-50 for feature extraction and an LSTM decoder.
  - Trained and evaluated the model on the MS COCO 2014 dataset and built a Flask-based web interface for real-time caption generation. Presented as a poster (certificate awarded).
- **Virtual Painting System using Finger Gesture Detection and Recognition | Minor Project** |*(Link to Project)*
  - Real-time hand/finger gesture tracking system enabling air-drawing via webcam, built with Python and OpenCV.
  - Presented at IOEGC16 - Oral Session.

PUBLICATION

Virtual Painting System using Finger Gesture Detection and Recognition
IOEGC16 | Published Research Paper | *[View Published Paper]*

SKILLS

- **QA & Testing:** Manual Testing, Functional Testing, Exploratory Testing, Regression Testing, Responsive Testing, Cross-Browser Testing, Test Case Design, Bug Tracking, Black Box Testing, SDLC, STLC
- **Automation:** Selenium WebDriver, Python, pytest
- **QA Tools:** Jira, GitHub, Git, JMeter
- **Frontend:** HTML, CSS, JavaScript, React
- **Backend:** Node.js, Express.js
- **Programming:** Python, C, C++, JavaScript
- **Additional:** Docker, AWS
- **Soft Skills:** Attention to Detail, Communication, Teamwork, Problem Solving

TRAININGS AND CERTIFICATIONS

- **AWS Cloud Practitioner,** Broadway Infosys, 2026
- **Machine Learning with Python**, Broadway Infosys, 2025
- **LOCUS Software Fellowship**, IOE Pulchowk, 2023
